INFORMED CONSENT FORM

Our names are Samuel Simpson and Chloe Koschnick, and we are students at California State University, Chico. You are invited to participate in a research study testing the design and efficiency of our application.

If you volunteer, you will be asked to test the efficiency of our application within the context of two tasks as well as use a direct competitor's application doing the same two tasks. You will be given about 30 minutes to complete these tasks in these applications, however you'll probably not need all of that time.

If you agree to participate, you can stop at any time. This study may expose you to minor risks, but they are not expected to be any greater than risks you experience in daily life.

We intend to present our results to our instructor. You will not be identified in our results. You will be referred to by a specific number on data sheets instead of your name to provide anonymity. The data and any information that can identify you will be destroyed at the end of this semester by our instructor.

If you have any questions about the research, please contact us at sbsimpson@csuchico.edu, or through Kevin Buffardi at kbuffardi@mail.csuchico.edu.

Your participation implies that you have read and understand this information and that you may stop at any time without penalty.
